

Midsummer Place Shopping Centre

The Brief:

In celebration of the London 2012 Olympic bid, a presentation was to be held in a busy Milton Keynes shopping centre. A raised platform was required for the presentation, and a local production company contacted IPS. The platform was to be installed and removed on a tight time schedule, and needed to include a ramp for wheelchair access.

The Solution:

IPS supplied a stage constructed from their range of LiteDeck modular staging. An angled ramp was supplied at one side of the staging, and handrail was fitted to the rear and sides of the structure. Following a brief meeting to decide the exact position of the stage, everything was installed before the centre opened for trading, and removed after the event by a team of two staging crew.

The Outcome:

The client was pleased with the production, and how everything was managed by IPS in an efficient and cost effective manor.

Impact Production Services can supply staging either from modular stocks, or custom built shapes and sizes to meet your requirements. Decks are available as dry hire or purchase items, or a production solution can be arranged; please contact us for further information.
