

## The Financial Services Forum- Annual Member's Dinner

### The Brief:

The prestigious annual member's dinner is hosted by the Financial Services Forum at top London venue The Royal Opera House, Covent Garden. Impact Production Services were approached to provide a custom set in keeping with the style of the venue, alongside lighting for the event.

### The Solution:

A truss framed set was constructed by IPS, with the arch being the central theme, to complement the barrel roof and glasswork of the venue. This was fitted with a rear projection screen surface to allow graphics to be displayed. White vinyl covered flats provided branding opportunities for the main event sponsors. A truss lectern matching the set was also supplied.

A stage was also supplied, constructed from LiteDeck modular staging system, and covered in blue carpet.

Lighting for the event was also provided by IPS, and many intelligent Martin fixtures was used, controlled from an Avolites Pearl. This was alongside LED Pars up lighting the set and truss.

### The Outcome:

Very positive feedback was received from both the client and guests at the event, and all ran smoothly. As IPS has previously worked on this event, the designs had to be developed from the previous year, and we look forward to a fresh challenge for the next event.

Creative set and lighting solutions are available from IPS, alongside a full range of sound and other equipment. Contact us to discuss your requirements.
